

COMMUNITY FLOOD PREPAREDNESS FUND

In 2020, Virginia established the Community Flood Preparedness Fund (CFPF) to protect Virginians from growing flood risk from more frequent, intense storms and sea level rise. The CFPF provides loans and grants for projects, studies, and planning throughout the Commonwealth to identify and address flood vulnerability for communities. CFPF funds can build capacity in localities that otherwise would not have the resources to develop comprehensive flood vulnerability assessments and action-oriented flood mitigation approaches.

NORTHERN VIRGINIA REGIONAL COMMISSION: HYDROLOGIC STUDY OF FOUR MILE RUN

With this CFPF award, the Northern Virginia Regional Commission will hire an engineering consultant to conduct a new hydrologic study of the Four Mile Creek watershed using historical streamflow and precipitation data. This study will provide a comprehensive understanding of multi-decadal changes in an urban watershed and inform regional coordination and planning efforts to support locally-specific watershed management and stormwater mitigation.

WHY IT MATTERS

“The proposed study would...help provide crucial information to local planners and emergency managers.”
