

# RGGI GRANTS

## COMMUNITY FLOOD PREPAREDNESS FUND

### Regions of Virginia

- Southwest
- West Central
- Valley
- Southside
- Central
- Hampton Roads
- Eastern
- Northern

Virginia's participation in the Regional Greenhouse Gas Initiative (RGGI) from 2021-2023 generated \$827.7M in revenue and reduced power plant pollution by 22%. Half of RGGI proceeds funded low-income energy efficiency programs and 45% funded the Community Flood Preparedness Fund (CFPF). Without RGGI, there is no mechanism to maintain long-term revenue for the CFPF.

The CFPF provides grants and loans for projects, studies, and planning throughout the Commonwealth to identify and address flood vulnerability for communities. CFPF funds can build capacity in localities that need additional resources to develop comprehensive flood vulnerability assessments and action-oriented flood mitigation approaches.

## CITY OF LEXINGTON STORMWATER STUDY

Collaborating with Civil Consulting Group, P.C., the City of Lexington will utilize this CFPF award to continue an analysis of the City's stormwater infrastructure and hydraulic capacity, including up to 230 structures and pipes primarily located in the northeastern part of the City. The City has spent money on water and sewer updates over the years, but needs stormwater improvements. Importantly, this study will assess flood risk and mitigation opportunities near one of the City's public housing apartment complexes.
